

The difference is Elementary

Everyone likes to work with people they trust that's why at Elementary Technology we work to build partnerships because that way everybody wins.

This partnership approach starts with an assessment of your needs by our sales consultant. Once you are happy with our recommendations, if necessary we'll organise a site survey to ensure your installation goes smoothly. Our project co-ordinators will ensure you are kept fully informed at all times.

Our engineers are CRB checked so that they can work in educational establishments and we can install anything from a DVD player to a complex auditorium. We are used to installing onto high ceilings, in Portakabins, halls and lecture theatres. All our installations are covered by a one year warranty.

When your new technology is up and running, we can provide you with a preventative maintenance schedule, which helps keep all the equipment running and minimises downtime.

We build strong relationships with our suppliers, which give us access to unrivalled support that benefits our customers. By partnering with our customers, we build trust that means our relationship will be long term - leading to a greater understanding of your needs and a better service for you.

If you prefer technology that is
SIMPLE for people to use....

If you think a
STRAIGHTFORWARD approach
helps people to communicate....

If you agree that keeping
solutions UNCOMPLICATED
promotes understanding....

Then we should talk ...

Audio Visual and Information Technology Products, Services and Solutions.

.. because we agree with you

Elementary Technology is a national supplier of audio visual technology products, services and solutions to public and private sector organisations.

Our aim is to understand your organisation and recommend appropriate technology solutions that will make your life easier. We promise to always suggest what is best for you - not what is easiest for us.

Our sales consultants are trained to approach each new customer with an open mind so that they can fully understand your objectives and the challenges that you face.

They will use their expertise to come back to you with a solution that not only meets your immediate objectives and prepares for future requirements, but that integrates seamlessly into your organisation.

Whilst the tools we use may be highly technical, our recommendations always meet three clear criteria - they are simple to understand, straightforward to implement and uncomplicated to use.

We pride ourselves on excellence in sales and customer service support, which is achieved via dedicated staff in regional offices in Leeds and Bristol and our Head Office in Telford.

The building blocks of our solutions

Audio Visual Products

Projectors and interactive devices are a winning combination for a whole range of applications in business and education. From training rooms to classrooms, control centres to board rooms, these products promote involvement and help understanding wherever they are used.

Video Conferencing saves time and avoids the need for busy people to spend unproductive time travelling, which in turn is also environmentally friendly.

Elementary Technology partner with the leading suppliers of these technologies to bring you a whole range of audio visual solutions.

We can also install and maintain your equipment to protect your investment.

Display

The latest, flattest LCD or TFT computer monitors are visually stunning and save valuable desk space. We supply all sizes from 15" to 24" from brands including Sony, Philips, NRG, Iyama, HannsG, Acer, Samsung and many more.

If you want bigger, we can help you implement innovative ways to display all types of information in a dynamic and highly visual way on our LCD and Plasma screens, or large format displays. All the major manufacturers such as NEC, Philips, Fujitsu, Sony and Samsung are available.

Digital Signage

Communicate different messages to different audiences at the push of a button. The latest digital signage solutions replace traditional notice boards and posters, seamlessly integrating video, graphics, text and TV into a dynamic and eye-catching display. Ideal for any situation where information changes frequently such as canteens, transport depots, retail displays, leisure centres, concert halls or reception areas.

IT Products

We supply everything from an ink cartridge to a server, a cleaning kit to a cabinet.

As you would expect we can advise you on PCs, Laptops, Printers, Scanners and a whole host of other IT products.

Many of our products are on line and are at great prices too! www.elemtech.co.uk
