Dear Chris

On behalf of Pool CE Primary School I am dropping you a line to compliment you on the service we have received from your company after we enquired about our options for replacing our projectors. As a small Primary School we are proud of the fact that we are able to have Projectors and Whiteboards in each of our classrooms, but we have been concerned at the image quality and the cost of replacement Lamps for our original projectors. After you audited our existing systems, it became clear that we had to budget for replacing lamps and projectors and new installation works as our projectors were out of warranty. However we are delighted that your innovative approach to this problem has resulted in replacing all of the projectors (which the staff are delighted with) and including a preventative maintenance programme so that they are properly "deep cleaned" twice a year. All of this at only slightly more per year than we would have paid to "patch up" the existing installations. We were also very impressed with both the standard of the installations and the pleasant manner and professionalism of the installation team, please pass on our thanks. I would be happy to talk to any local schools considering using your company.

Yours sincerely

Mr R K Bumby
Headteacher
